Bailey Wickham

1.2 Task Log

- Initial Implimentation
 - Time: 1 hour
 - When: Tuesday Evening
 - Description: Code initial implimentation (1st and 2nd pass) from notes.
- Testing
 - Time: 20 minutes
 - When: Tuesday Evening
 - Description: Test against smaller than buffer size, larger than buffer size
- Code Demo
- Fix Bugs
 - Time: 5 Minutes
 - When: Wednesday Afternoon
 - Description: Add test case found in demo (it worked first try!)

1.3 Test Cases

- Tested smaller than buffer size
- Tested larger than buffer size
- Tested mostly one value

1.4 Notes

- Is the max always *bufsize*²?
- I started by doing it by bytes instead of number of ints and that was way harder, I'm sure the implimentation in real databases must be a mess of edge cases.
